“Everything is emotion” is the current theme for the collection of Jeannette Quakkelaar, typical by a extensive variation on this theme and an even bigger variation on used and various materials/media.

Characteristic are the strong emotional expressions of body parts/faces or devoted living creatures (so called animals) in combination with outstanding intense passionate colours. Sometimes with a poem or quote as a message in relief.

Our lives are lived through our emotions, from love & passion and fear as extremes.

Despite the fact that all artwork is different, there is an evident tangible totally new style which harmonizes it all together.

Please carry yourself in the amazing world what life can truly be, in the perspective of a totally original innovative Jeannette.

I am the embodiment of my paintings! My paintings is me!
